

“Our Planet- CONSUME WITH CARE”

Water, fire, air and dirt

These are the elements of planet earth.

Animals, humans, gold, diamond and copper,

It doesn't matter, what matter.

⁵ Just listen with the ear

Consume with care.

Human greed and destruction,

Causing bare disruption,

¹⁰Causing bare -----

RUPTION!

Give mother earth

A fighting chance

To re-birth her lush green grass and chocolate dirt

¹⁵Or even the flow of crystal droplets,

This quenches our thirst.

Let's heal the world

Making it a better place

For you and me,

The entire human race.

-Leonardo Fender.

“OUR Planet...CONSUME with CARE”

"One generation plants the trees; another gets the shade."

-Chinese Proverb

We are the caretakers with this our land
Hence we should treat it well and be grand
There is no life if we cannot stand
On this very land.
On this very land.

What is earth to you?
If I should ask
To me it's lovely seas and green green grass
From the tranquility of the of the rural areas in the tropics
To the cool and mist-filled areas in the artics.
How then can we not appreciate where we stand?
On this very land.
On this very land.
So why then are we so ungrateful
And treat the earth so playful
The harmful fumes we release in the air
The trees we cut down without any fear
The waster we release in our waters year after year
Are all examples of how we truly DON'T CARE!
But the earth is here for us and we need to take

A stand...

For this very land.

For this very land.

What have we got to lose? you may ask

Our crops, lands and more which were very hard tasks

Yet we still cut down the trees,

Leaving the rays of the sun to destroy us with ease.

But all this will still happen unless we cease

And start protecting this land in which we breathe.

Be that one person who stands with no fear

And protect our planet, consume with care.

We are the caretakers of this our land.

Hence we should treat it well and be grand.

There is no life if we can't stand,

On this very land.

On this very land.
