END NOTES I

(to the Second Schedule)

1. For the exclusive purpose of allowing international trade in fibre from vicuñas (*Vicugna vicugna*) and their derivative products, only if the fibre comes from the shearing of live vicuñas. Trade in products derived from the fibre may only take place in accordance with the following provisions:

(a) Any person or entity processing vicuña fibre to manufacture cloth and garments must request authorization from the relevant authorities of the country of origin (Countries of origin: The countries where the species occurs, that is, Argentina, Bolivia, Chile, Ecuador and Peru) to use the “vicuña country of origin” wording, mark or logo adopted by the range States of the species that are signatories to the Convention for the Conservation and Management of the vicuña;

(b) Marketed cloth or garments must be marked or identified in accordance with the following provisions:

(i) For international trade in cloth made from live-sheared vicuña fibre, whether the cloth was produced within or outside of the range States of the species, the wording, mark or logo must be used so that the country of origin can be identified. The VICUÑA [COUNTRY OF ORIGIN] wording, mark or logo has the format as detailed below:

VICUNA [PAIS DE ORIGEN]

This wording, mark or logo must appear on the reverse side of the cloth. In addition, the selvages of the cloth must bear the words VICUÑA [COUNTRY OF ORIGIN];

(ii) For international trade in garments made from live-sheared vicuña fibre, whether the garments were produced within or outside of the range States of the species, the wording, mark or logo indicated in paragraph (b)(i) must be used. This wording, mark or logo must appear on a label on the garment itself. If the garments are produced outside of the country of origin, the name of the country where the garment was produced should also be indicated, in addition to the wording, mark or logo referred to in paragraph (b)(i);

(c) For international trade in handicraft products made from live-sheared vicuña fibre produced within the range States of the species, the

SECOND SCHEDULE, *contd.*END NOTES I, *contd.*

VICUÑA [COUNTRY OF ORIGIN]—ARTESANÍA wording, mark or logo must be used as detailed below:

VICUÑA [PAIS DE ORIGEN] ARTESANIA

- (d) If live-sheared vicuña fibre from various countries of origin is used for the production of cloth and garments, the wording, mark or logo of each of the countries of origin of the fibre must be indicated, as detailed in paragraphs (b)(i) and (ii);
 - (e) All other specimens shall be deemed to be specimens of species listed in Schedule 1 and trade in them shall be regulated accordingly.
2. Populations of Botswana, Namibia, South Africa and Zimbabwe (listed in the Second Schedule):

For the exclusive purpose of allowing:

- (a) trade in hunting trophies for non-commercial purposes;
- (b) trade in live animals to appropriate and acceptable destinations, as defined in Resolution Conf. 11.20 (Rev. CoP18), for Botswana and Zimbabwe and for in situ conservation programmes for Namibia and South Africa;
- (c) trade in hides;
- (d) trade in hair;
- (e) trade in leather goods for commercial or non-commercial purposes for Botswana, Namibia and South Africa and for non-commercial purposes for Zimbabwe;
- (f) trade in individually marked and certified ekipas incorporated in finished jewellery for non-commercial purposes for Namibia and ivory carvings for non-commercial purposes for Zimbabwe;
- (g) trade in registered raw ivory (for Botswana, Namibia, South Africa and Zimbabwe, whole tusks and pieces) subject to the following:
 - (i) only registered government-owned stocks, originating in the State (excluding seized ivory and ivory of unknown origin);

SECOND SCHEDULE, *contd.*END NOTES I, *contd.*

- (ii) only to trading partners that have been verified by the Secretariat, in consultation with the Standing Committee; to have sufficient national legislation and domestic trade controls to ensure that the imported ivory will not be re-exported and will be managed in accordance with all requirements of Resolution Conf. 10.10 (Rev. CoP18) concerning domestic manufacturing and trade;
 - (iii) not before the Secretariat has verified the prospective importing countries and the registered government—owned stocks;
 - (iv) raw ivory pursuant to the conditional sale of registered government-owned ivory stocks agreed at CoP12, which are 20,000 kg (Botswana), 10,000 kg (Namibia) and 30,000 kg (South Africa);
 - (v) in addition to the quantities agreed at Cop12, government-owned ivory from Botswana, Namibia, South Africa and Zimbabwe registered by 31 January 2007 and verified by the Secretariat may be traded and despatched, with the ivory in paragraph (g)(iv) above, in a single sale per destination under strict supervision of the Secretariat;
 - (vi) the proceeds of the trade are used exclusively for elephant conservation and community conservation and development programmes within or adjacent to the elephant range; and
 - (vii) the additional quantities specified in paragraph (g)(v) above shall be traded only after the Standing Committee has agreed that the above conditions have been met; and
- (h) no further proposals to allow trade in elephant ivory from populations already in the Second Schedule shall be submitted to the Conference of the Parties for the period from CoP14 and ending nine years from the date of the single sale of ivory that is to take place in accordance with provisions in paragraphs (g)(i), (g)(ii), (g)(iii), (g)(vi) and (g)(vii). In addition such further proposals shall be dealt with in accordance with Decisions 16.55 and 14.78 (Rev. CoP 16).

SECOND SCHEDULE, *contd.*END NOTES I, *contd.*

On a proposal from the Secretariat, the Standing Committee can decide to cause this trade to cease partially or completely in the event of non-compliance by exporting or importing countries, or in the case of proven detrimental impacts of the trade on other elephant populations.

All other specimens shall be deemed to be specimens of species included in the First Schedule and the trade in them shall be regulated accordingly.

9. Artificially propagated specimens of the following hybrids and/or cultivars are not subject to the provisions of the Convention:
 - *Hatiora x graeseri*;
 - *Schlumbergera x buckleyi*;
 - *Schlumbergera russelliana x Schlumbergera truncata*;
 - *Schlumbergera orssichiana x Schlumbergera truncata*;
 - *Schlumbergera opuntioides x Schlumbergera truncata*;
 - *Schlumbergera truncata* (cultivars);
 - *Cactaceae* spp. Colour mutants, grafted on the following grafting stocks: *Harrisia 'Jusbertii'*, *Hylocereus trigonus* or *Hylocereus undatus*;
 - *Opuntia microdasys* (cultivars).
10. Artificially propagated hybrids of the following genera are not subject to the provisions of the Convention, if conditions, as indicated under (a) and (b), are met: *Cymbidium*, *Dendrobium*, *Phalaenopsis* and *Vanda*:
 - (a) specimens are readily recognizable as artificially propagated and do not show any signs of having been collected in the wild such as mechanical damage or strong dehydration resulting from collection, irregular growth and heterogeneous size and shape within a taxon and shipment, algae or other epiphyllous organisms adhering to leaves, or damage by insects or other pests; and
 - (b) when shipped in non-flowering state, the specimens must be traded shipments consisting of individual containers (such as cartons, boxes, crates or individual shelves of CC-containers) each containing 20 or more plants of the same hybrid; the plants within each container must exhibit a high degree of uniformity and healthiness; and the shipment must be accompanied by documentation, such as an invoice, which clearly states the number of plants of each hybrid; or

SECOND SCHEDULE, *contd.*

END NOTES I, *contd.*

- (ii) when shipped in flowering state, with at least one fully open flower per specimen, no minimum number of specimens per shipment is required but specimens must be professionally processed for commercial retail sale, *e.g.* labelled with printed labels or packaged with printed packages indicating the name of the hybrid and the country of final processing. This should be clearly visible and allow easy verification.

Plants not clearly qualifying for the exemption must be accompanied by appropriate CITES documents.

11. Artificially propagated specimens of cultivators of *Cyclamen persicum* are not subject to the provisions of the Convention. However, the exemption does not apply to such specimens traded as dormant tubers.
12. Artificially propagated hybrids and cultivars of *Taxus cuspidata*, live, in pots or other small containers, each consignment being accompanied by a label or document stating the name of the taxon or taxa and the text 'artificially propagated', are not subjected to the provisions of the Convention.

END NOTES
(to the third Schedule)

- #1 All parts and derivatives, except:
- (a) seeds, spores and pollen (including pollinia);
 - (b) seedling or tissue cultures obtained in vitro, in solid or liquid media, transported in sterile containers;
 - (c) cut flowers of artificially propagated plants; and
 - (d) fruits and parts and derivatives thereof of artificially propagated plants of the genus *Vanilla*.
- #5 Logs, sawn wood and veneer sheets.
- #13 The kernel (also known as 'endosperm', 'pulp' or 'copra') and any derivative thereof.

THIRD SCHEDULE, *contd.*APPENDIX TO THE FIRST,
SECOND AND THIRD SCHEDULES(First Schedule,
Second Schedule
and Third Schedule)*Interpretation*

1. Species included in the First, Second and Third Schedules (herein referred to as “these Schedules”) are referred to—

- (a) by the name of the species; or
- (b) as being all of the species included in a higher taxon or designated part thereof.

2. The abbreviation “spp.” is used to denote all species of a higher taxon.

3. Other references to taxa higher than species are for the purposes of information or classification only. The common names included after the scientific names of families are for reference only. They are intended to indicate the species within the family concerned that are included in these Schedules. In most cases this is not all of the species within the family.

4. The following abbreviations are used for plant taxa below the level of species—

- (a) “ssp.” is used to denote subspecies; and
- (b) “var.” or “vars.” is used to denote variety or varieties, respectively.

5. As none of the species or higher taxa of FLORA included in the First Schedule is annotated to the effect that its hybrids shall be treated in accordance with the provisions of Article III of the Convention, this means that artificially propagated hybrids produced from one or more of these species or taxa may be traded with a certificate of artificial propagation, and that seeds and pollen (including pollinia), cut flowers, seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers of these hybrids are not subject to the provisions of the Convention.

6. The names of the countries in parentheses placed against the names of species in the Third Schedule are those of the Parties submitting these species for inclusion in this Schedules.

7. When a species is included in one of these Schedules, the whole, live or dead, animal or plant is included. In addition, for animal species listed in Schedules III and plant species listed in Schedule II or III, all parts and derivatives of the species are also included in the same Schedule unless the species is annotated to indicate that only specific parts and derivatives are included. The symbol # followed by a number placed against the name of a species or higher taxon included in Schedule II or III refers to a footnote that indicates the parts or derivatives of animals or plants that are designated as ‘specimens’ subject to the provisions of the Convention in accordance with Article 1, paragraph (b), subparagraph (ii) or (iii).

THIRD SCHEDULE, *contd.*APPENDIX TO THE FIRST,
SECOND AND THIRD SCHEDULES, *contd.*

8. The terms and expressions below, used in annotations in these Schedules, are defined as follows:

9. For the purposes of these Schedules—

“extract” means any substance obtained directly from plant material by physical or chemical means regardless of the manufacturing process, including—

- (a) a solid, such as crystals, resin, fine or coarse particles;
- (b) a semi-solid, such as gums and waxes; or
- (c) a liquid, such as solutions, tinctures, oil and essential oils;

“finished musical instruments” means a musical instrument (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) that is ready to play or needs only the installation of parts to make it playable. This term includes antique instruments (as defined by the Harmonized System codes 97.05 and 97.06; Works of art, collectors’ pieces and antiques);

“finished musical instrument accessories” means a musical instrument accessory (as referenced by the Harmonized System of the World Customs Organization, Chapter 92; musical instruments, parts and accessories of such articles) that is separate from the musical instrument, and is specifically designed or shaped to be used explicitly in association with an instrument, and that requires no further modification to be used;

“finished musical instrument parts” means a part (as referenced by the Harmonized System of the World Customs organization, Chapter 92, musical instruments, parts and accessories of such articles) of a musical instrument that is ready to install and is specifically designed and shaped to be used explicitly in association with the instrument to make it playable;

“finished products packaged and ready for retail trade” means products, shipped singly or in bulk, requiring no further processing, packaged, labelled for final use or the retail trade in a state fit for being sold to or used by the general public;

“powder” means a dry, solid substance in the form of fine or coarse particles;

THIRD SCHEDULE, *contd.*APPENDIX TO THE FIRST,
SECOND AND THIRD SCHEDULES, *contd.*

“shipment” means cargo transported under the terms of a single bill of lading or air waybill, irrespective of the quantity or number of containers, packages, or pieces worn, carried or included in personal baggage;

“Ten (10) kg per shipment” means the weight of the individual portions of each item in the shipment made of wood of the species concerned. In other words, the 10 kg limit is to be assessed against the weight of the individual portions of wood of *Dalbergia*/*Guibourtia* species contained in each item of the shipment, rather than against the total weight of the shipment;

“Transformed wood” means, as defined by Harmonized System code 44.09: Wood (including strips, friezes for parquet flooring, not assembled), continuously shaped (tongued, grooved, v-jointed, beaded or the like) along any edges, ends or faces, whether or not planed, sanded or end-jointed;

“woodchips” means wood that has been reduced to small pieces.”.
